

Cabin Air Filter Installation Instructions

The interior vent filter is located under the cowl on the passenger side of the vehicle.

1. Both windshield wiper arms must be removed. Pull the wipers away from the windshield so they point away from it.
2. Rotate each retaining clip at the base of each windshield wiper counterclockwise. Hold each clip in this position while removing the wiper arm.
3. Remove the six screws from the cowl shield at the base of the windshield. (See Figure 1)
4. Open hood.
5. Remove the four plastic screws from the forward section of the cowl shield.
6. Disconnect the windshield washer hose from the Y-connector located at the rear passenger corner of the engine compartment.
7. Remove the cowl shield.
8. Remove the four screws from the interior vent filter cover.
9. Pull the interior vent filter forward and remove from the vehicle. (See Figure 2)
10. Install the filter and reinstall the cowl shield in the reverse order of removal.
